MCS-51 microcontroller interface and application experiments and training guide

By DONG GUO ZENG

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 121 Publisher: Machinery Industry Press. Pub. Date :2009-02. In this study, and training guide includes five chapters: Chapter 1. used in the experiment. ICF-59 + EDA microcontroller training system profile; Chapter 2. Keil uVision2 environmental profiles; Chapter 3 of Wei Fu (Wave) Simulation Development Environment; Chapter 4 for single-chip experiment. arranged according to the teaching requirements of 20 experiments for the students. to help readers master the theory of content and gives the reference circuit and reference procedures; Chapter 5 for practical system design. so that the reader through the practical application of systems analysis. to the composition of the single-chip applications. development. development of a deeper understanding and increased the microcontroller application development approach introduced . so that the reader of the entire chip development process and development process need to pay attention to understand the actual development of the reader microcontroller applications to provide theoretical guidance. Finally. a common arrangement in the appendix chip pin diagram and function map to help readers use the chip. MCS-51 microcontroller interface and application of experimental and training guidance can...

Reviews

The ideal publication i possibly go through. I was able to comprehended every thing out of this published e publication. I am delighted to explain how this is actually the finest pdf i have got read inside my personal existence and could be he very best ebook for possibly.

-- **Roberto Friesen**

This written book is excellent. It typically is not going to price a lot of. I found out this book from my dad and i encouraged this book to discover.
